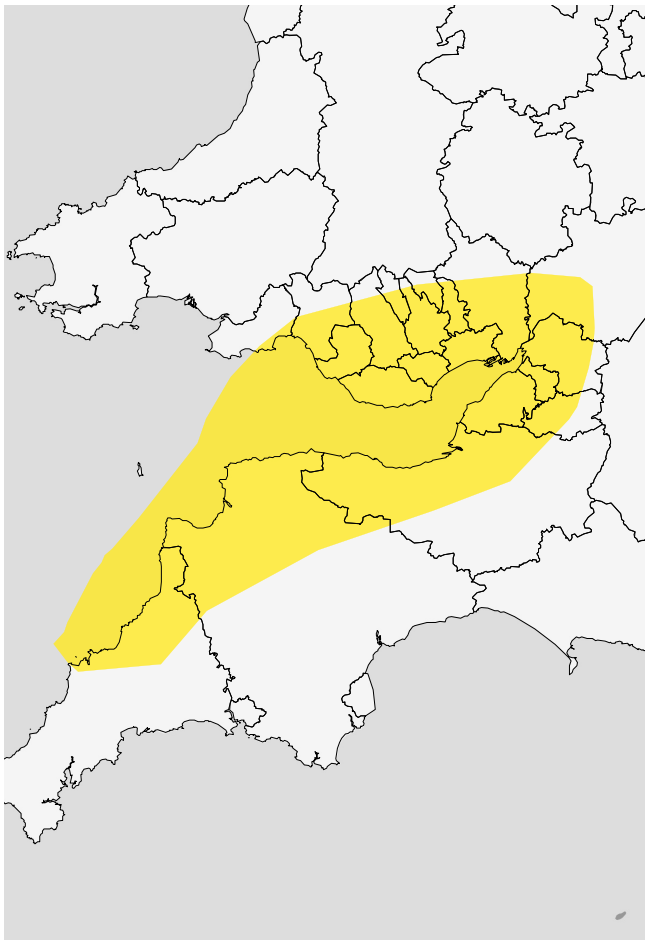
Yellow warning
Thunderstorm

Between
11:00 Sun 9 Jul 2023 and
20:00 Sun 9 Jul 2023



Heavy showers and thunderstorms may cause disruption in some places on Sunday.

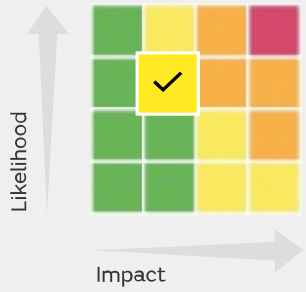
What to expect

- There is a good chance that driving conditions will be affected by spray, standing water and/or hail, leading to longer journey times by car and bus. Flooding is also likely to affect a few roads
- Delays to train services are possible
- Possible damage to a few homes and businesses, from either flooding or lightning strikes
- Some short term loss of power and other services could occur

Further details

Areas of heavy showers and thunderstorms are likely to form over parts of southwest England and Wales during Sunday. Whilst the majority of these will move through fairly quickly, giving short-lived downpours or thunderstorms, there is a chance of them lining up with a few spots potentially seeing repeated bouts of heavy rain and thunder.

Where this happens some disruption could occur with up to around 25 mm of rain falling in an hour and perhaps 40 mm in 2 or 3 hours. Frequent lightning, hail and a few strong wind gusts could accompany these storms.



Medium likelihood of low impacts

Issued at 10:13 Sun 9 Jul, 2023
